About SPi Global

SPi Global is a market-leading content technology and content solutions enterprise that provides data services and subject matter expertise (SME) to multiple industries such as publishing, finance, healthcare and life sciences, media and retail, research, learning, and corporates. Leveraging its deep domain expertise and suite of proprietary technology platforms, the company brings forth cutting-edge innovation for the extraction, enrichment and transformation of structured and unstructured content and information assets.

With a client-base scoping 30 countries worldwide, SPi Global delivers business transformation services from 19 centers across the globe. The company's multi-geographical resource pool is comprised of more than 14,700 employees strategically located in six countries, the Philippines, India, US, China, Nicaragua and Vietnam.
